

**Black Widow 1869** is the slickest, fastest, ultra-smooth, burnishable racing finish available. Its powerful dual-biocides provide multi-season protection in all waters. Black Widow is easily applied by roller, brush, or spray and is easily burnishable to a metallic “gun-metal” shine. Black Widow makes an excellent paint for the bottom of any boat where speed is the number one priority, including racing sailboats, and high performance offshore powerboats. Black Widow contains four strong slickening agents: Molybdenum Disulfide, PTFE, Graphite and Silicon. Available in quarts and gallons.

**H2 Prime 4740/4741** is a low VOC, two-part water-based epoxy primer designed for use as an adhesion promoter with Hydrocoat, Hydrocoat SR, Hydrocoat Eco, and Neptune 5. When used with Bio-Blue Surface Prep 92, this non-sanding system is VOC compliant in all areas. This system does not void hull warranties against osmotic blistering. H2-Prime dries to a hard, durable coating that provides additional protection against scuffing and scratching. Extended over-coating times mean easier scheduling and a lower chance of paint failure due to missed windows.

**SeaGold Satin 2045** brings marine wood coatings into the 21st century. Offering the beauty and durability of varnish, the ease of use of synthetic wood treatments, all while being low-odor, low VOC, and user friendly. UV-Stable resins are combined with added UV inhibitors to provide a long lasting finish that will not turn brown or orange with exposure to the elements. Its fast-drying formula allows 3 to 4 coats to be applied in one day. Unlike many other wood treatments, SeaGold can be applied over existing varnishes, and its translucent amber color does not hide or blur the wood grain. Clean up is made easy with soap and water. SeaGold is VOC compliant in all areas. Available in quarts only.

**EZ-Bond 7080** is a two-part thickened epoxy glue designed for bonding wood, fiberglass, composites, and even metals. EZ-Bond uses a unique resin specifically engineered for maximum adhesion. For high stress bonds, the resin is also non-brittle and will resist cracking. It is thickened to prevent sagging and running, and is excellent for bonding surfaces where a gap must be filled. Cold weather is not an issue for EZ-Bond, as it will cure at temperatures as low as 35°. Available in cartridge and quarts kits.

**EZ-Tex 7100** is an easy to use marine epoxy repair compound for use where a high strength, waterproof, permanent repair is needed. This unique formula creates a tenacious bond to most surfaces. Its buttery consistency will not sag or shrink and is excellent for filling cracks, gouges and voids. A 1:1 ratio makes mixing easy. EZ-Tex can be sanded, drilled, tapped, sawed and painted once cured.

**EZ-Poxy Performance Enhancer 3021** is an additive that can be used in all Pettit high gloss solvent based topside paints: EZ-Poxy, EZ-Decks, EZ-Bilge, and Varnishes. Its advanced formulation reacts with the paint it is mixed in to “cross-link” polymers within the paint film, providing exceptional durability, gloss, hardness, gloss retention, scratch resistance, and longevity. Unlike other two-part urethanes, paints catalyzed with this hardener can be applied over well adhered one-part finishes. EZ-Poxy Performance Enhancer truly makes achieving a high quality, long lasting yacht finish easy.

**Water Based Brushing Thinner 140** is used to thin Pettit water based products including Captain's Sea-Gold, Hydrocoat, Hydrocoat Eco, Hydrocoat SR, Neptune 5, and EZ-Cabin Coat. This flow enhancer will make the product easier to apply when environmental conditions are tough, and will reduce the appearance of brush marks and roller stipple. Available in quarts and gallons.

## Product Changes

**Hydrocoat Eco** - New color: Dark Blue 1224

**Easy epoxy** - New label, new colors added, product line renamed EZ-Poxy

3175	Gloss White name changed to White	3715	New color added: Seattle Gray
3108	Off-White name changed to Hatteras Off-White	3290	New color added: Dark Blue
3184	New color added: Mediterranean White	3720	Dark Gray name changed to Steel Gray
3208	New color added: Hatteras Cream	3456	New color added: Fighting Lady Yellow
3624	Bright Red name changed to Fire Red	3176	New color added: Blue Glow White
3237	Electric Blue name changed to Electric Sapphire Blue	3333	Newport Green name changed to Seafoam Green
3303	Dull Dead Grass now part of EZ-Poxy line	3021	EZ-Poxy Performance Enhancer

**Hydrocoat SR** - Currently unavailable until the fall of 2016 - Replace with Hydrocoat or Hydrocoat Eco

**SR-21** - Currently unavailable replace with SC-21 Fresh Water Speed Coating
