

SeaGold

Premium Wood Finish

The Most Advanced Marine Wood Finish

- 🐟 Provides a yacht quality finish for brightwork without the hassles of traditional varnish
- 🐟 Translucent, amber finish highlights the natural beauty of wood
- 🐟 Excellent UV Protection provides long lasting protective finish that won't darken or change colors over time
- 🐟 Clean up with soap and water
- 🐟 Fast dry formula allows 3 to 4 coats per day

SeaGold brings marine wood coatings into the 21st century. Offering the beauty and durability of varnish, the ease of use of synthetic wood treatments, all while being low-odor, low VOC, and user friendly. UV-Stable resins are combined with added UV inhibitors to provide a long lasting finish that will not turn brown or orange with exposure to the elements. Its fast-drying formula allows 3 to 4 coats to be applied in one day. Unlike many other wood treatments, SeaGold can be applied over existing varnishes, and its translucent amber color does not hide or blur the wood grain. Clean up is made easy with soap and water. SeaGold is VOC compliant in all areas.
