# SAFETY DATA SHEET

Revision Date 05-May-2016 Version 1

## 1. Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Product name Product code Lobster Buoy 11831 Black 61183106

**1.2** Relevant identified uses of the substance or mixture and uses advised against

Recommended Use Restrictions on use Paint Read label instructions and SDS

#### 1.3 Details of the supplier of the safety data sheet

Kop-Coat, Inc. / Pettit Marine Paint Marine Group 36 Pine Street Rockaway, NJ 07866 1-800-221-4466

#### 1.4 Emergency telephone number

Emergency telephone number Chemtrec: +1 703-527-3887 ex-USA Chemtrec: 1-800-424-9300 USA

## 2. Hazards identification

# 2.1 Classification of the substance or mixture

#### GHS Classification in accordance with 29 CFR 1910.1200

| Skin sensitization                                 | Category 1 |
|----------------------------------------------------|------------|
| Carcinogenicity                                    | Category 2 |
| Specific target organ toxicity (repeated exposure) | Category 1 |
| Flammable liquids                                  | Category 3 |

## 2.2 Label elements

<u>Signal Word</u> Danger

#### **Hazard Statements**

May cause an allergic skin reaction Suspected of causing cancer Causes damage to organs through prolonged or repeated exposure Flammable liquid and vapor

# **Precautionary Statements - Prevention**

Obtain special instructions before use

Do not handle until all safety precautions have been read and understood Wear protective gloves/protective clothing/eye protection/face protection Contaminated work clothing should not be allowed out of the workplace Do not breathe dust/fume/gas/mist/vapors/spray Wash face, hands and any exposed skin thoroughly after handling Do not eat, drink or smoke when using this product Keep away from heat/sparks/open flames/hot surfaces. - No smoking Keep container tightly closed Ground/Bond container and receiving equipment Use explosion-proof electrical/ventilating/lighting/equipment Use only non-sparking tools Take precautionary measures against static discharge

#### **Precautionary Statements - Response**

If exposed or concerned: Get medical advice/attention If skin irritation or rash occurs: Get medical advice/attention Wash contaminated clothing before reuse IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/ shower In case of fire: Use CO2, dry chemical, or foam to extinguish

## Precautionary Statements - Storage

Store locked up Store in a well-ventilated place. Keep cool

#### Precautionary Statements - Disposal

Dispose of contents/container to an approved waste disposal plant

#### 2.3. Other Hazards Hazards not otherwise classified (HNOC) Not Applicable

# 2.4 Other information

Not Applicable

#### Unknown Acute Toxicity

2.16078427% of the mixture consists of ingredient(s) of unknown toxicity

# 3. Composition/Information on Ingredients

#### Substance Not applicable Mixture

| Chemical Name                              | CAS-No     | Weight % |
|--------------------------------------------|------------|----------|
| Distillates, petroleum, hydrotreated light | 64742-47-8 | 10 - 20  |

| 8052-41-3  | 10 - 20                                                                                                |
|------------|--------------------------------------------------------------------------------------------------------|
| 1317-65-3  | 5 - 10                                                                                                 |
| 1333-86-4  | 1 - 5                                                                                                  |
| 64742-88-7 | 1 - 5                                                                                                  |
| 1330-20-7  | 1 - 5                                                                                                  |
| 8008-20-6  | 1 - 5                                                                                                  |
| 100-41-4   | < 1                                                                                                    |
| 27253-31-2 | < 1                                                                                                    |
| 68955-83-9 | < 1                                                                                                    |
| 96-29-7    | < 1                                                                                                    |
|            | 1317-65-3<br>1333-86-4<br>64742-88-7<br>1330-20-7<br>8008-20-6<br>100-41-4<br>27253-31-2<br>68955-83-9 |

The exact percentage (concentration) of composition has been withheld as a trade secret.

## 4. First aid measures

#### 4.1 Description of first-aid measures

| General advice                     | For further assistance, contact your local Poison Control Center.                                                                                                                                                                                                                    |  |  |
|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| Eye contact                        | Immediately flush with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Call a poison control center or doctor for treatment advice. |  |  |
| Skin contact                       | Wash off immediately with plenty of water for at least 15 minutes. Remove contaminated clothing and shoes. Wash contaminated clothing before reuse. Call a poison control center or doctor for treatment advice.                                                                     |  |  |
| Inhalation                         | Move victim to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a poison control center or doctor for treatment advice.                                                                                                        |  |  |
| Ingestion                          | Rinse mouth. Do NOT induce vomiting. If a person vomits when lying on his back, place him in the recovery position. Call a physician or poison control center immediately.                                                                                                           |  |  |
| 4.2 Most important symptoms and    | effects, both acute and delayed                                                                                                                                                                                                                                                      |  |  |
| Symptoms                           | See Section 2.2, Label Elements and/or Section 11, Toxicological effects.                                                                                                                                                                                                            |  |  |
| 4.3 Indication of any immediate me | edical attention and special treatment needed                                                                                                                                                                                                                                        |  |  |
| Notes to physician                 | There is no specific antidote for effects from overexposure to this material. Treat symptomatically.                                                                                                                                                                                 |  |  |

# 5. Fire-Fighting Measures

#### 5.1 Extinguishing media

## Suitable extinguishing media

Foam. Carbon dioxide (CO<sub>2</sub>). Dry chemical. Water spray or fog. Water may be used to cool and prevent the rupture of containers that are exposed to the heat from a fire.

**Unsuitable Extinguishing Media** Water may be unsuitable for extinguishing fires.

#### 5.2 Special hazards arising from the substance or mixture

#### Special Hazard

Most vapors are heavier than air. They will spread along ground and collect in low or confined areas (sewers, basements, tanks) Vapors may travel to areas away from work site before igniting/flashing back to vapor source Thermal decomposition can lead to release of irritating gases and vapors

Hazardous Combustion Products Possible formation of carbon oxides, nitrogen oxides, and hazardous organic compounds.

#### **Explosion Data**

Sensitivity to Mechanical Impact Not sensitive.

#### Sensitivity to Static Discharge Yes.

#### 5.3 Advice for firefighters

Evacuate personnel to safe areas. Move non-burning material, as feasible, to a safe location as soon as possible. As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear. Cool containers with flooding quantities of water until well after fire is out. Thoroughly decontaminate all protective equipment after use. DO NOT extinguish a fire resulting from the flow of flammable liquid until the flow of the liquid is effectively shut off. This precaution will help prevent the accumulation of an explosive vapor-air mixture after the initial fire is extinguished.

# 6. Accidental Release Measures

#### 6.1 Personal precautions, protective equipment and emergency procedures

Avoid contact with skin, eyes and clothing. Ensure adequate ventilation. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Stop leak if you can do it without risk. Refer to protective measures listed in sections 7 and 8. Avoid exceeding of the given occupational exposure limits (see section 8). Personal protection needs must be evaluated based on information provided on this sheet and the special circumstances created by the spill including; the material spilled, the quantity of the spill, the area in which the spill occurred, and the training and the expertise of employees in the area responding to the spill.

#### 6.2 Environmental precautions

Prevent product from entering drains. Prevent entry into waterways, sewers, basements or confined areas. See Section 12 for additional Ecological information.

## 6.3 Methods and materials for containment and cleaning up

| Methods for Containment | Dike far ahead of liquid spill for later disposal. Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Prevent further leakage or spillage if safe to do so.                                                                        |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Methods for cleaning up | Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Ground and bond containers when transferring material. Take precautionary measures against static discharges. Use non-sparking tools and equipment. |

#### 7. Handling and storage

#### 7.1 Precautions for safe handling

| Advice on safe handling             | Ensure adequate ventilation. Ground and bond containers when transferring material.<br>Handle in accordance with good industrial hygiene and safety practice. Avoid contact with<br>skin, eyes and clothing. Keep away from open flames, hot surfaces and sources of ignition.<br>Take precautionary measures against static discharges. Do not eat, drink or smoke when<br>using this product. Use according to package label instructions. Empty containers may<br>retain product residue or vapor. Do not pressurize, cut, weld, braze, solder, drill, grind, or<br>expose container to heat, flame, sparks, static electricity, or other sources of ignition. No<br>smoking. |
|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Hygiene measures                    | Avoid contact with skin, eyes and clothing. Remove and wash contaminated clothing before re-use. Do not eat, drink or smoke when using this product. Wash hands before breaks and immediately after handling the product.                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 7.2 Conditions for safe storage, in | cluding any incompatibilities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Storage Conditions                  | Keep container tightly closed in a dry and well-ventilated place. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Keep in properly labeled containers. Keep away from food, drink and animal feedingstuffs. Store in accordance with local regulations.                                                                                                                                                                                                                                                                                                                                                                           |
| Materials to Avoid                  | No materials to be especially mentioned.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

# 8. Exposure controls/personal protection

## 8.1 Exposure Guidelines

| Chemical Name                                               | ACGIH TLV                                                                                                                                                       | OSHA PEL                                                                                   | British Columbia                                                                    | Alberta                                                                                    | Quebec                                                                                     | Ontario TWAEV                      |

#### 8.2 Appropriate engineering controls

**Engineering Measures** Ensure adequate ventilation, especially in confined areas. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. Use adequate ventilation to maintain airborne concentrations at levels below permissible or recommended occupational exposure limits.

## 8.3 Individual protection measures, such as personal protective equipment

| Eye/Face Protection      | Safety glasses with side-shields. If splashes are likely to occur, wear:. Tightly fitting safety goggles.                                                                                                                                                                                                                                                                                                                                           |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Skin and body protection | Solvent-resistant gloves. Nitrile rubber. Neoprene gloves. Impervious butyl rubber gloves. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion. Wear suitable protective clothing. Remove and wash contaminated clothing before re-use. |
| Respiratory protection   | If exposure limits are exceeded or irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn. Respiratory protection must be provided in accordance with current local regulations.                                                                                                                                                                                                                                      |
| Hygiene measures         | See section 7 for more information                                                                                                                                                                                                                                                                                                                                                                                                                  |

#### 8.22 lb/gal

# 10. Stability and Reactivity

## 10.1 Reactivity

Density

No dangerous reaction known under conditions of normal use

#### 10.2 Chemical stability

Stable under recommended storage conditions

#### 10.3 Possibility of hazardous reactions

None under normal processing.

#### 10.4 Conditions to Avoid

Keep away from heat, sparks and flames.

#### 10.5 Incompatible Materials

No materials to be especially mentioned.

# 10.6 Hazardous Decomposition Products

None under normal use conditions. Thermal decomposition can lead to release of irritating gases and vapors.

# **11. Toxicological information**

## 11.1 Acute toxicity

# Numerical measures of toxicity: Product Information

## The following values are calculated based on chapter 3.1 of the GHS document

| Unknown Acute Toxicity | 2.16078427% of the mixture consists of ingredient(s) of unknown toxicit |  |
|------------------------|-------------------------------------------------------------------------|--|
| Oral LD50              | 93,875.00 mg/kg                                                         |  |
| LC50 (Dust/Mist)       | 106.20 mg/l                                                             |  |
| LC50 (Vapor)           | 779.00 mg/l                                                             |  |

## 15.2 U.S. Federal Regulations

#### SARA 313

Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA). This product contains a chemical or chemicals which are subject to the reporting requirements of the Act and Title 40 of the Code of Federal Regulations, Part 372:

| Chemical Name            | SARA 313 - Threshold Values % |
|--------------------------|-------------------------------|
| Xylene<br>1330-20-7      | 1.0                           |
| Ethylbenzene<br>100-41-4 | 0.1                           |

## 15.3 Pesticide Information

Not applicable

## 15.4 U.S. State Regulations

#### California Proposition 65

This product contains the following Proposition 65 chemicals:

| Chemical Name                                         | California Prop. 65                              |
|-------------------------------------------------------|--------------------------------------------------|
| Carbon black - 1333-86-4                              | Carcinogen                                       |
| Ethylbenzene - 100-41-4                               | Carcinogen                                       |
| Crystalline silica (Quartz) (Respirable) - 14808-60-7 | Carcinogen                                       |
