

THE GAME CHANGER

Before SeaGold, only the most gifted craftsman, with years of experience and days of preparation, could deliver the depth and beauty of a SeaGold Finish. The remarkable quick-dry formula allows 3 to 4 coats to be applied in one day. Application is easier than the most basic, synthetic wood treatments, yet the finish is perfection. Unlike other synthetics, the translucent amber hue will not hide or blur wood grain, nor will

it turn brown or orange with exposure to the elements. No marine wood finish, not Cetol®, not varnish, not any synthetic, is as durable, as beautiful and as easy to apply. And only SeaGold cleans up with soap and water.

Finally, a real game-changer. What a craftsman did with days of prep, patience and varnish, SeaGold does in a fraction of the time with technology.
