

# EZ-Poxy Performance Enhancer

## Topside Finish Performance Enhancing Additive

-  Increases gloss, hardness, durability and longevity of Pettit solvent based topside finishes
-  Provides the durability and gloss of linear polyurethanes with the ease of use of enamels and one-part polyurethanes
-  Increases flow out of brush strokes and roller stipple, providing a mirror-like high gloss finish

Pettit # 3021

EZ-Poxy Performance Enhancer is an additive that can be used in all Pettit high gloss solvent based topside paints: EZ-Poxy, EZ-Decks, EZ-Bilge and Varnishes. Its advanced formulation reacts with the paint it is mixed in to “cross-link” polymers within the paint film, providing exceptional durability, gloss, hardness, gloss-retention, scratch resistance, and longevity. Unlike other two-part urethanes, paints catalyzed with this hardener can be applied over well adhered one-part finishes. EZ-Poxy Performance Enhancer truly makes achieving a high quality, long lasting yacht finish easy.
