October 1, 2021

## PETTIT MARINE PAINT NAMED WINNER OF MOST INNOVATIVE MARINE COMPANY AWARD

*Pettit Paint Continues Pioneering Innovative Solutions*

**Rockaway, N.J.** – Pettit is proud to announce being selected as winner of the most innovative marine company by Sounding Trade Only at this year's International BoatBuilders' Exhibition and Conference in Tampa, FL.

Throughout the struggles of 2020, Pettit successfully continued to drive creative and strategic innovation both internally and externally. Pettit overcame challenges by focusing on key strategic areas; primarily, research and development and manufacturing. Through improvements in R&D labs, improving and increasing warehouse and shipping capacity, and investing in people, Pettit was able to not only continue to promptly service customers but also introduce twelve new products to the market.

Some of the key products added to the portfolio were multi-season, triple-biocide antifouling paints Odyssey® Triton and Trinidad® XSR. These powerful antifouling paints have both Industry-leading biocide technology while also being environmentally friendly. HRT® ECO is an ECONEA® based aerosol antifouling solution that is safe for all underwater metals. AnchorTech® Adhesives and Sealants were also launched into the market. These new adhesives are easy to use, feature leading edge technology and aggressively priced. In addition to these new products, Pettit introduced the Industry-leading Hull Defense (HD) Warranty. These eighteen and twenty-four month limited warranties surpass anything existing in the marketplace today.

"We are honored to be recognized by the industry as one of the most innovative companies in 2021. Innovation this day and age is no longer optional. We have aggressively invested in people, capacity and culture to drive innovation in coatings with real technology gains while delivery a customer centric experience. The best is yet to come and we are excited to be part of this great industry of innovators." Pettit President - Scott Townsend
