PETTIT PAINT LAUNCHES REVOLUTIONARY PETTIT PROTECT FAST DRY HIGH BUILD EPOXY PRIMER

Increased Speed, Superior Protection: New Product Revolutionizes Boat Maintenance for Faster Turnarounds

Greensboro, N.C., - Pettit Paint, a leader in innovative marine coatings, is proud to announce the launch of its latest breakthrough product—Pettit Protect Fast Dry High Build Epoxy Primer. Engineered to drastically speed up overcoating and boat launch times, this revolutionary high build formula is set to become a game-changer for boatyards, OEMs, and boat owners looking for faster project completions without compromising protection.

Pettit Protect Fast Dry is the next generation in high build epoxy primers, offering unmatched performance for boats in need of superior protection from blistering and corrosion. With a rapid dry time, this new formula enables same-day recoat and, in some cases, same-day launch, making it ideal for busy boatyards and OEM production schedules.

OEMs and Boatyards will increase productivity while reducing work in process times and getting boats through production faster.

Key Features and Benefits:

- **Fast-Drying Formula:** Ready for recoating within hours, ensuring quicker overcoat windows.
- **High Build Protection:** Provides excellent barrier protection against water intrusion, blistering, and corrosion.
- **Ideal for OEMs and Boat Yards:** Enables faster turnarounds and higher productivity during peak seasons.
- **Enhanced Durability:** Ensures long-lasting, high-performance results, extending the life of vessels in all marine environments.
- **Multi-Surface Compatibility:** Suitable for use on fiberglass, steel, and aluminum surfaces.

PRESS RELEASE

"Time is money for boatyards, OEM's and boat owners alike. With Pettit Protect Fast Dry, we're proud to introduce a primer that offers unparalleled protection with the added benefit of significantly reduced application time. This new product is the result of years of research and testing, designed to maximize efficiency and minimize downtime." -Chick Michaud, Vice President of Marine Sales

Pettit Protect Fast Dry is a direct response to the growing demand for faster turnaround times in the marine industry, particularly as boatyards face increased workloads and unpredictable weather conditions. The product's quick dry time allows boat maintenance to be performed more efficiently, especially in regions with short weather windows for application.
